

$\mathrm{i}y$

$$z = x + \mathrm{i}y$$

The diagram shows a complex plane with a horizontal real axis labeled x and a vertical imaginary axis labeled $\mathrm{i}y$. A blue dot represents the complex number $z = x + \mathrm{i}y$. A red dot represents the point $z + \epsilon$. A green line segment connects the blue dot to the red dot, and is labeled with a green ϵ .

$$z + \epsilon$$
